THE CATHOLIC UNIVERSITY OF KOREA

CUK: Cradle of Global Leaders Shaping Human Society's Progress

VISION

Leading Global Education and Research
Centered on Life
The Catholic University of Korea

CUK 2025+ Strategy

Building Our Future Engines

- Advancing Global Engagement
- Elevating Job Placement Success
- Enhancing Our Reputation
- Developing a Comprehensive Lifelong Learning Framework

VISION NEW CUK 2025

Educational Reform

- Strengthening Ethical Leadership Training
- Increasing Flexibility in Academic Systems
- Specialization in Liberal Arts Education to Enhance Job Competencies
- Operating Employment/ Entrepreneurship Friendly Academic Systems

Focused Research Enhancement

- Expanding the Pool of Distinguished Researchers
- Nurturing Specialized Research Areas
- Innovation in Research Support Systems
- Increase in External Research Funding

Administrative System Improvement

- Continuous Innovation in Academic Structure and System
- Enhancing Professionalism among Staff and Faculty
- Improving Financial Stability
- Elevating the University Brand

Leading in Industry-Academia Collaboration

- Driving Social Innovation
- Fostering Future Technologies
- Strengthening Regional Connections
- Expanding Global Collaborations

Songsim (University Headquarter Office)
43 Jibong-ro, Bucheon-si, Gyeonggi-do

CUK HISTORY

Building Tomorrow's Future on a Legacy of History

Founding Philosophy: Respect for Humanity
Educational Philosophy: Truth, Love, and Service based on Catholic Principles
Vision for Talent: Ethical leaders who are equipped with integrity and creativity
Educational Objectives: Fostering professionals who uphold human dignity
Fostering well-rounded individuals contributing to the enrichment of national culture
Fostering globally-minded citizens dedicated to societal advancement and peace

1800's

1855

1855 Father Maistre established "St. Joseph's Seminary" in Baeron Holy Ground, Jecheon, Chungcheongbuk-do

1887. 03 Relocation to Wonhyoro, Yongsan-gu, Seoul Renamed to "The Sacred Heart of Jesus Seminary"

1900's

1936. 05 Opening of St. Mary's Hospital in Jung-gu, Seoul

1947. 04 Approved for status promotion and established as Songsin University

1954. 04 Expansion of the Medical Department

1959. 02 Renamed Songsin University to the Catholic University of Korea

1959.02

1962. 06 Inception of Catholic Medical Center (CMC)

1964. 01 Establishment of Sacred Heart Women's University in Chuncheon, Gangwon-do

1982. 03 Consolidation of Chuncheon campus of Sacred Heart Women's University into the current Bucheon campus

1994. 09 Establishment of the Catholic Educational Foundation, with Cardinal Kim Sou-hwan as the first chairman

1995. 03 Launch of the integrated "Catholic University of Korea"

1995.03

1998. 06 Inauguration of the 2nd Chairman, Archbishop Jin-suk Chung

1999. 12 Establishment of Dasol Hall

2000's

2005.05

2004. 07 Inauguration of Michael Hall

2005. 05 Celebration of the 150th Anniversary of the CUK

2007. 07 The opening of the annex building of the Institute of Medical Science at Songeui Campus

2008. 02 Transition to a Graduate School of Medicine

2008. 03 Establishment of Songeui Hall

2009. 03 Opening of Seoul St. Mary's Hospital

2009. 08 Establishment of the International Hub Building (Cardinal Kim Sou-hwan International Hall and Sacred Heart Convention Center)

2010's

2010. 10 Establishment of the College of Pharmacy

2012. 03 Establishment of ELP College

2012. 08 Inauguration of the 5th Chairman, Archbishop Soo-jung Yeom

2013. 01 Construction of the Chung Jin-suk Cardinal College of Pharmacy

2013. 12 Acquired the University Institutional Evaluation Accreditation

2017. 01 Inauguration of the 7th President, Father Jongchul Won

2018. 03 Establishment of the Entrepreneurial University

2018. 09 Selected as an Autonomous Improvement University in Basic Competency Diagnosis

2014.05

2020's

2022.05

2020. Celebration of the 165th Anniversary of the CUK

2021. 03 Inauguration of the 8th President, Father Jongchul Won

2021. 12 Inauguration of the 6th Chairman, Archbishop Jung Soon-taek

2022. 05 Establishment of the Andrea Hall

2022. 05 Establishment of Omnibus Park at the Songeui Campus

CUK: Center of Global Academia

Since 1855, CUK has been at the forefront of advanced education as the first Western-style higher education institution in Korea.

2020 Academic Ranking of World Universities

Nursing Program Rank: 1st in Korea

ARWU

ARWU evaluates global universities on Nobel/Fields Medal winners, top-tier research citations, and publications in prestigious journals like Nature and Science.

2021 US News & World Report

Rank: 6th in Korea

US News & World Report

Recognized for its longstanding history and credibility in global university evaluations by US News & World Report, assessing 13 criteria including research output and publications.

2022 QS World University Rankings

Rank: 14th in Korea

QS World University Rankings

QS World University Rankings by British global university rating agency, QS, reflects academic and alumni reputation, citation per faculty, student-to-faculty ratio, and international faculty/student ratio.

2024 Times Higher Education (THE) World University Rankings

Rank: 18th in Korea

THE World University Rankings

THE, based in the UK, evaluates universities on five criteria: educational environment, research environment, quality of research, industry-academic collaboration, and internationalization.

Key National Projects

CUK'S TODAY

Discover yourself from a humanistic perspective

Understand yourself through exploration of language, arts, culture, and philosophies, and discover the values of life

Humanities

Humanities Programs

Korean Language & Literature | This program is committed to shaping experts skilled in expressing our cultural and emotional narratives through our language.
Korean. Philosophy | This program is committed to developing thinkers who delve into life's fundamental questions, exploring the realms of ethics, knowledge, and the intricacies of human thought.
Korean History | Focused on elevating the understanding of Korean culture, this program prepares students to contribute meaningfully to societal progress and national unity.

Language and Literature Programs

English Language & Literature | This program offers an extensive exploration of English literature and culture, preparing graduates for the interconnected global landscape.
Chinese Language & Culture | This program emphasizes mastery of Chinese language and culture, aspiring to produce experts for pivotal roles in Northeast.
Asian commerce. Japanese Language & Culture | This program nurtures specialists deeply versed in the language and culture of Japan, a key player in global dynamics.
French Language & Literature | This program nurtures professionals with a comprehensive grasp of French society and culture, and a global perspective in French language expertise.

Music Program

This program is committed to cultivate professional musicians who enrich society through their pursuit of musical artistry.

Theology School (Songsin Campus)

Theology | This program is dedicated to developing clergy inspired by Jesus Christ, ready to serve in the church, the nation, and global society, along with training committed Christian lay leaders.

Social Sciences

Social Sciences

Social Welfare | This program focuses on advancing social work methods and analyzing welfare policies to enhance the societal roles of individuals, families, and communities.
Psychology | This program explores human behavior and cognition, aiming to produce professionals who improve life quality and contribute globally.
Sociology | This program offers in-depth studies of societal structures and their evolution, training future leaders with a strong foundation in sociological theory and critical thinking.
Special Education | This program prepares educators specialized in enhancing the lives of children with disabilities, focusing on social integration and quality of life improvements.

Business

Business Administration | This program offers studies of organizational management through a scientific lens to cultivate leaders with a blend of ethical leadership, entrepreneurial spirit, and global business acumen.
Accounting | This program enhances expertise in accounting, global communication, and IT, nurturing future leaders who will shape the global accounting landscape.

International and Legal Studies

International Studies | This program develops well-rounded experts in global affairs, armed with comprehensive knowledge to promote international justice, communication, and cooperation.
Law | This program strives to instill the values of Truth, Love, and Service in legal practices, producing professionals for diverse roles in legal, administrative, financial, media, and public sectors.
Economics | This program provides practical economic education to create rational economists and skilled professionals who can respond to societal needs.
Public Administration | This program builds skills for analyzing social phenomena and public sector challenges, preparing graduates to create impactful public policies and programs.

Global Business School

Global Future Business | This program fostering global business leaders with skills in discerning global information, understanding technology, and solving
complex problems. Tax, Accounting, and Finance | This program equips students with digital analytics and accounting integration skills to become ethical professionals in tax, accounting, and finance.
IT Finance | This program trains leading experts in IT finance, specializing in digital finance (targeting professionals graduated from specialized high schools).

Leaders capable of analyzing and providing structured solutions to social problems, and projecting future advancements for society.

Providing blueprints for the future by diagnosing problems in society

Professionals who can illuminate the world with science and medicine

Driven by a creative pursuit of truth and a deep love for humanity

Natural Sciences

Natural Sciences

Chemistry | This program fosters innovators who contribute to environmental protection through chemical transformations.

Mathematics | This program shapes problem-solvers who effectively apply mathematical knowledge and problem-solving skills in various real-world scenarios.

Physics | This program cultivates experts who contribute to cultural advancement through systematic and organized exploration of natural phenomena and principles, fostering a collaborative spirit.

Department of Living Sciences

Space Design and Consumer Studies | This program fosters professionals to enhance consumer and living standards, applying theoretical and practical knowledge.

Clothing Studies | This programs fosters experts focused on enhancing life environments through the study of interactions between humans, clothing, and the environment.

Child Studies | This program fosters specialists who analyze the impact of family, society, and culture on child development, with applications in various fields including childcare and policy.

Food and Nutrition | This program fosters professionals versed in food and nutrition sciences, committed to societal service.

Biomedical Sciences | This program fosters experts capable of producing various pharmaceuticals for treating human diseases and simultaneously conducting fundamental and applied research in biomedical sciences.

School of Pharmacy

Pharmacy | This program fosters experts capable of producing various pharmaceuticals for treating human diseases and simultaneously conducting fundamental and applied research in biomedical sciences.

College of Medicine (Songeui Campus)

This program fosters medical professionals with a holistic approach to human life and a dedication to serving life, rooted in Catholic values.

Pre-Medical Science / Medical Science

College of Nursing (Songeui Campus)

Nursing | This program fosters nurses with a strong foundation in bioethics, holistic care, and health problem-solving, emphasizing respect for life.

Engineering/ Free Major

Smart Innovators and Pioneers of the "New Normal"

Setting their own benchmarks based on a deep understanding of the rapidly evolving and high-tech fields

ICT Engineering Programs

Computer and Information Engineering | This program fosters proficient engineers in all aspects of computer science, combining in-depth IT theory with hands-on experience.

Media Technology and Contents | This program fosters world-class engineers with a strong sense of responsibility, rooted in human-centered education, and equipped with practical design skills and creativity.

Information and Communication Electronics Engineering | This program fosters experts in this field, emphasizing comprehensive abilities in CAP, practical design, adaptability, as well as collaboration and leadership skills.

Bio-Convergence Engineering Programs

Biotechnology | This program offers a curriculum grounded in essential sciences like biochemistry and molecular biology to train specialists for contributions in research institutes and hospitals, enhancing human welfare.

Energy and Environmental Engineering | This program fosters professionals to address energy and environmental challenges with eco-friendly solutions.

Biomedical Chemical Engineering | This program fosters experts capable of contributing to interdisciplinary fields, including AI, pharmaceuticals, healthcare, and functional chemicals.

Artificial Intelligence | This program fosters professionals to apply AI across various sectors and integrate it with other academic disciplines, leading industrial innovation.

Data Science | This program fosters data scientists skilled in the entire data lifecycle, from collection to analysis, with a strong emphasis on practical application.

Biomedical Software | This program fosters capable of analyzing medical big data through a blend of biotechnology, computer science, and mathematics.

Interdisciplinary Studies

This program fosters innovative, ethical, and cooperative problem solvers who can blend expertise from various disciplines to tackle the challenges of a rapidly changing society.

Interdisciplinary Studies (Humanities and Social Sciences)

Interdisciplinary Studies (Natural Sciences and Living Sciences)

CUK: Center of Global Academia

CUK Acquired the highest grade of 'S' in the “2023 Annual Evaluation of University Innovation Support Project”

CUK has achieved the highest grade of 'S' in the “2023 Annual Evaluation of University Innovation Support Project” announced by the & SYSTEM Ministry of Education, marking it as a leading innovator among domestic universities. Since the inception of the University Innovation Support Project in 2019, CUK has consistently earned the top grade in all three annual evaluations.

This year, CUK was recognized for establishing an innovative educational model with its new paradigm in educational innovation: a “ flexible academic system tailored to the growth stages of students” from admission through early and mid-study phases.

CUK's innovative efforts have led to remarkable achievements in global university rankings as well. In the “2024 THE World University Rankings” published by Times Higher Education (THE), one of the top three global university ranking organizations, CUK impressively climbed over 600 places from the previous year, ranking between 601-800 worldwide and 18th nationally, showcasing its exceptional growth.

CUK: At the Forefront of Futuristic Metaversity Education

CUK leads the first national-level shared university initiative in Korea, the Catholic Liberal Arts Shared University (CU12), involving 12 private universities across the country. This collaboration, initiated to establish a futuristic education infrastructure, aims to bridge the educational gap caused by the concentration of educational infrastructure in metropolitan areas and promote mutual growth among participating universities.

- Realization of Futuristic Metaversity Model
  * Metaversity: A blend of “Metaverse” and “University”
- To overcome the physical and resource limitations of traditional universities and address regional imbalances in higher education
- Established 17 courses (As of the Spring 2023 semester) (Classes beginning on February 20, 2023)
- Currently, approximately 1,410 students are enrolled in these courses

Micro-degree Programs

Designed to foster specialists who can adapt to rapidly changing societal needs

Professional Degree

This is one of the micro-degree programs which is unique to CUK, designed to fosterProfessional DESIGNers who can adapt to rapidly changing societal needs through a converged, job-focused education.

- This program features flexible and innovative academic systems, offering 6 to 15 credits with reduced course loads. They include job-specific lectures, industry visits, and teachings from industry professionals, incorporating active industry-academic collaboration.
- Students participating in this program receive a completion certificate and a digital badge, in addition to a notation on their transcript.

What are Micro-Degree Programs?

Featuring micro-credits (12-15 credits) and nano-credits (6-9 credits) that are lower than a minor (21 credits), these programs are tailored to respond actively to societal and technological changes in the era of the Fourth Industrial Revolution.

※ Note: These are not formal degree programs, but completion is noted on the transcript.

INFRA & SYSTEM

An innovative response to the changes demanded by the Fourth Industrial Revolution and the decline in the school-age population for universities

To not just withstand but also thrive on the waves of change, the CUK has established a variety of internal and external infrastructure and systems.

Innovative Recruitment in Two Major Academic Streams

Recruiting in Humanities and Social Sciences / Natural Sciences and Engineering

Guaranteeing 100% freedom of major selection for students

Actively supporting students in career planning and enhancing their right to choose majors, CUK is vigorously reforming its freshman recruitment system.
Following the recruitment of students into nine specialized streams and the establishment of a free major department, from the 2025 academic year onwards, CUK plans to further strengthen students' rights to choose their majors, recruiting students without specific major or department distinctions into two broad streams (Humanities and Social Sciences, Natural Sciences and Engineering).

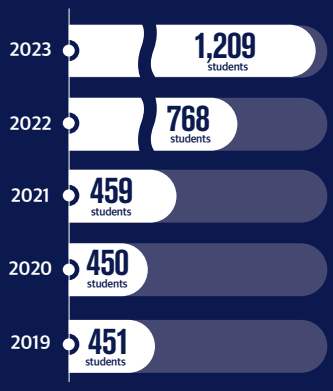

This broad-stream recruitment approach is expected to enhance Catholic University's competitiveness in admissions, encourage autonomous innovation within majors and departments at a university-wide level, and drive the enhancement of career and employment competencies through the free completion of majors by enrolled students.

CUK's extensive global network

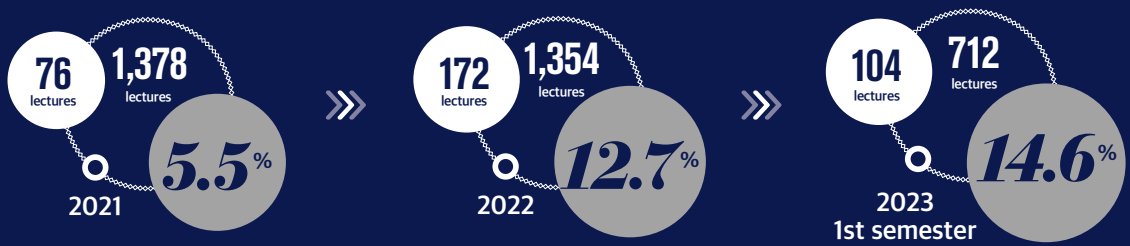

for nurturing innovative talents for the global stage

GLOBAL NETWORK

Global Network **40** countries **170** institutions

(As of 2023)

Overseas Student Exchange Programs

Student Exchange Program

Credits earned at partner institutions are also recognized as (major and non-major) credits at our university

Introduction	A program that allows students to study at partner universities at a lower cost
Tuition	Students only pay tuition to our university (tuition exemption at partner university)
Benefit	Affordable opportunity for students

Visiting Student Program

Credits earned at partner institutions are also recognized as (major and non-major) credits at our university

Introduction	A program allowing students to study at partner universities at their own expense
Tuition	Tuition Payment for Both Home and Host Universities
Benefit	Offers students a wide choice of popular universities to apply to

SAF(Study Abroad Foundation)

Credits earned at partner institutions are also recognized as (major and non-major) credits at our university

Introduction	An overseas university credit acquisition system that allows students to study at foreign universities
Tuition	Tuition Payment for Both Home and Host Universities
Benefit	Offers programs suited to students' circumstances

Short-term exchange programs

ASEACCU

Association of Southeast and East Asian Catholic Colleges and Universities The association hosts annual university-level conferences that align with the most relevant themes for the country and time, including presentations and discussions, to promote personal, academic, and cultural exchanges.

EASCOM

A cultural exchange program initiated by Japan's Hokusei Gakuen University, inviting students from our university and schools in Indonesia, China, and Taiwan for cultural exchange.

International Summer School (CGSS)

A summer program hosted by Catholic University, allowing international students to experience Korean language courses and Korean culture during the summer break Any student from our university can apply for the CGSS assistant position

Short-Term Language Study

Through exchange agreements between our university and foreign institutions, our students can participate in short-term language programs during summer and winter breaks.
Short-term language study participants can earn up to 3 credits, with 22 hours of language instruction equating to 1 credit, through "Summer Language Study" and "Winter Language Study" programs.

CUK is Shaping a Bright Future

with Reliable Research Capabilities

Research Funding

※ Basis for Compilation

Period of research considered from January to December / Based on full-time faculty members / Research funding (excluding in-kind contributions and internal university research)

Year	Projects	Research Fund
2020	612	68 billion KRW
2021	602	690 billion KRW
2022	609	740 billion KRW

A total of **1,823** projects, ***210*** billion KRW

Major Research Projects

Project Name	Period	Research Fund	Category
BK21 Project (Future Talent-Oriented Medical Scientists Education and Research Group)	2020 ~ 2022	4 billion KRW	Independent
Smoking Cessation Camp Project	2020 ~ 2022	6.6 billion KRW	Independent
Center for Training Bio-data Engineers	2020 ~ 2021	3.9 billion KRW	Sub
Arti cial Intelligence Training Data Establishment Project (AI Data on Gastrointestinal System)	2020	3.2 billion KRW	Overarching
Research in support of innovative technologies for infectious disease response, 2023	2023	3.9 billion KRW	Sub
Development of technologies for the acquisition and value enhancement of natural products, 2023	2023	3.9 billion KRW	Independent
2022 Stage 4 BK21 Project	2022 ~ 2023	3.9 billion KRW	Independent

2023 Leiden Ranking

Rank: **2nd** in Korea

Ranking universities based on the top 1% citation rate in the social sciences and humanities field

Leiden Ranking

Evaluating the quality of research papers representing a university's research capacity, including the number of papers, number of citations, and citation rate, and announcing university rankings

CUK Infrastructure:
For a Successful Campus Life

Catholic University of Korea believes in generous education support as an investment for a successful future.

01 Dormitories

Facilities established to provide convenience for students commuting from distant areas and international students, fostering mutual respect and self-governance in a multicultural environment. In addition to the existing Stefano Dormitory's capacity of 1,159 students, the new Andrea Hall accommodates 476 students. Consequently, CUK is now offering comfortable living spaces for a total of 1,635 students

Dormitory Capacity

Songsim	Songeui	Songsin
1,718 students	118 students	306 students

02 Student Counseling Center

The Psychological Services are available to all enrolled students for free, offering comprehensive psychological assessments and one-on-one interpretation. Personal and group counseling sessions are also available for mental maturity and psychological stability.

Psychological Testing	Operating Period: Ongoing Target: Students interested in psychological assessments
Individual Counseling	Operating Period: Ongoing Target: students seeking help with psychological issues (up to two sessions during enrollment)
Group Counseling	Operating Period: three times per semester (subject to change based on the counseling center's schedule) Target: Students interested in discussing and receiving help on specific topics
Locations Operating hours	Nichols Hall Room 121, 8:30 AM - 5:30 PM (During holidays: 9:00 AM - 5:00 PM)

03 Chaplain's Office

The Chaplain's Office is an open space for everyone, regardless of religion, providing opportunities for true self-discovery, community activities, Bible study, and exploring life's ultimate goals and truths through liturgy and prayer.

04 Subsidized Medical Treatment at Affiliated Hospitals

CUK has affiliated hospitals contributing to patient care and the advancement of medical education, and they are open to all our students. Students can focus on their studies in good health thanks to the benefits of reduced medical fees.

Eligibility	Enrolled students, graduate students (both general and special programs), and international exchange students
Fee Reduction	100% covered for initial and follow-up medical consultations / 30% co-payment on medical treatment costs * 100% covered for initial and follow-up medical consultations / 30% co-payment on medical treatment costs
Hospitals	Yeouido St. Mary's Hospital, Seoul St. Mary's Hospital, Uijeongbu St. Mary's Hospital, Eunpyeong St. Mary's Hospital, Bucheon St. Mary's Hospital, St. Vincent's Hospital, Incheon St. Mary's Hospital, Daejeon St. Mary's Hospital

05 Scholarship Program

The CUK is deeply committed to supporting its students, providing various scholarships designed to ease the financial strain of tuition and enhance academic drive. These scholarships cater to a range of students including those with outstanding academic records, active involvement in campus activities such as student government, campus media, and ambassador programs, as well as students facing financial hardships.

Songsim Campus	**Truth Scholarship**	For students with excellent academic performance
	Love Scholarship	For students working in campus institutions and those from financially challenged backgrounds
	Service Scholarship	For students actively participating in campus activities and programs
	Special Scholarship	For students admitted through special admission processes
Songeui Campus	**Merit Scholarship**	For students with excellent academic performance
	Omnia Scholarship	For students from financially challenged backgrounds
	Service Scholarship	For students actively participating in campus activities
	Special Scholarship	For students admitted through special admission processes
Songsin Campus	**Church Degree Scholarship**	For religious students in their final year of the STB program
	Hasang Scholarship	For students from financially challenged backgrounds
	Academic Encouragement Scholarship	For students with excellent academic performance
	Peace Scholarship	For all religious students

CUK Employment

Entrepreneurship Support: Taking Responsibility for the Future through Step-by-Step Programs

CUK has established an innovative process to find one's true self and take the first step towards the future.

Career Development Program

CUK operates a "READY - GET SET - GO" step-by-step project to cultivate practical talents who can immediately excel in the field. Furthermore, we have formed a Career and Employment Guidance Professor System, providing specialized career, employment, and on-site training tailored to career fields and job positions. Even if it's not your major, you can consult with professors in your area of interest.

READY
Career Design (Year 1)

- Discovering Myself Semester Festival
- Analysis of Industry Fundamentals and Trends
- OJT from Current Professionals
- Online Mentorship from Professionals

GET SET
Improving Professional Skills (Years 2-3)

- Recruitment (Company/Position) Briefing Sessions
- Alumni Mentorship
- Professional Skills Boot Camp
- Specialized Career Lectures

GO
Real-world Employment (Year 4)

- Interview-intensive Week
- Resume Review
- CYP Employment Study & Coaching
- Special Lectures on Employment

Entrepreneurship Support Programs

We actively provide education to broaden understanding of business, laying the foundation for entrepreneurship, and offering opportunities to turn ideas into reality through entrepreneurship clubs, competitions, festivals, etc. At the same time, CUK supports students' dreams and encourages student entrepreneurship by providing practical advice from external experts.

Entrepreneurship related Courses

- Support for External Expert Lectures
- Capstone Design Courses
- Capstone Design Intra-university Competitions
- Capstone Design Inter-university Competitions

Student Entrepreneurship and Business Support

- Business Realization Support
- Institutional Clubs
- Entrepreneurship Clubs
- Entrepreneurship LAB

Entrepreneurship Education Program Planning

- Entrepreneurship Competitions
- Entrepreneurship Camp
- Entrepreneurship Special Lectures
- Entrepreneurship Mentorship
- Handmade Fair

AI Smart Integrated Support System

An AI-based personalized platform designed to integrate various services within the university and provide customized information to students. It analyzes information in various areas such as students' aptitude, academics, career, employment, and counseling.
It also manages the entire curriculum of students from admission to graduation as well as the history of their participation in extracurricular programs including counseling, career, and employment/entrepreneurship activities. At the same time, AI analyzes students' aptitudes and preferences to recommend personalized courses, extracurricular activities, projects, and external activities.

The AI Smart Integrated Support System integrates fragmented information related to career, employment, academics, and student support, aligning with the increasing societal demand for expanding AI services. Its goal is to establish a student-centered career development and career/employment support platform. AI Coordinators and data-based education outcome management, as well as AI portfolios, are expected to significantly enhance the quality of education and students' abilities.

Yearly Career and Employment Enhancement Roadmap

Years 1-2

Exploration of Career and Employment Fields

- Exploration of Career and Employment Fields
- Career Roadmap Competition

Year 3

Job expertise and practical experience

- Acquiring professional certifications
- Mentoring by industry professionals
- Awarded in competitions and contests

Year 4

Personality Traits/NCS

- Mock Exams
- Mock Interviews

Fieldwork Experience

- Long-term On-site Internships
- Domestic and International Internships

Field Selection

- Industry Analysis for Field Selection
- Job Analysis for Field Selection

Establishment of the Catholic University AI Smart Integrated Support System

Providing a student-centered career planning and career development platform from admission to graduation

- Establishment of a student-centered career development and career/employment support environment
- \+
- Operation of competency-based curriculum and extracurricular education programs and certification system
- \+
- Establishment of a closed-loop system for data-based performance analysis and improvement of education quality

Major projects

Function/Process/System/Data Integration

- Career Planning, Career Development, and Competency-based Integrated Curriculum and Extracurricular Services
- User-centered Function, Process, Data Integration, and Transfer

Incorporating the Latest Technologies such as AI and Blockchain

- AI-based Tailored Recommendations for Curriculum, Extracurricular Activities, Career, and Employment
- Certification Management through the Introduction of Blockchain-based Open Badges
- Mobile Service Support Suitable for the Era of Smart Information Technology
- Improvement of Service Environment with UI/UX

Role-based Features for Administrators, Students, Professors, etc.

- Customized Content and Features Based on User Roles
- Role-based Permissions and Access Control, Providing Statistical Information

EMPLOYMENT

CUK Whole Person Education: Nurturing Future Experts

with Both Expertise and Character

01 Songsim Campus

ELP(Ethical Leaders rearing Program)

Introduction

- CUK's flagship education program for cultivating ethical leaders
- Fosters ethical leaders based on character, intellect, and spirituality
- Equips individuals with ethical character and creative problem-solving skills
- Comprises both curriculum and extracurricular tracks

Composition

[Curriculum Area]
Complete at least 19 credits

- **Character Development:** At least 11 credits
- **Problem-Solving Abilities:** At least 8 credits

[Extracurricular Area]
Complete at least 50 credits

- **Character Development:** At least 10 credits
- **Problem-Solving Abilities:** At least 20 credits

Special Benefits

- Scholarship Bene ts (50 students per year, 1 million KRW per student)
- ELP Certification upon graduation
- Priority selection for exchange students
- ELP course completion notation on transcripts

Love Sharing Volunteering

CUK offers the "Love Sharing" course through which students can achieve self-realization and embrace the Catholic spirit by participating in community service activities.
In 2012, CUK became the first in Korea to designate a compulsory course on volunteering, leading the way in education that harmonizes character and ethics.

02 Songsin Campus

Community-Centered Education Program

Introduction

- Cultivating individuals with morality, artistic sensibility, and a healthy physique
- Education for autonomy in shaping one's life
- Pursuit of human maturity and a Christ-centered life

Composition

[Philosophical Education]
Year 1-2

- **Philosophical and rational reflection on humanity and the world**
- **Development of humanistic knowledge and sensibilities**

[Philosophical Education]
Year 1-2

- **Learning about the mysteries of Christ and the Christian way of life**
- **In-depth understanding of the life of the Church and the duties of priesthood**

Community Activities

- Theological Society: A small community that reflects on God's word.
- Life Group: Activities such as sports and theater outings for aesthetic sensibility and community learning

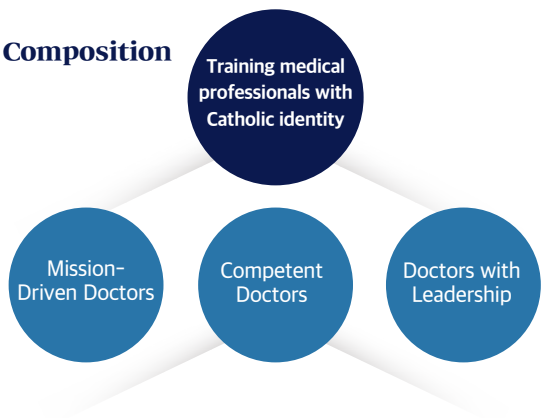

03 Songeui Campus

Omnibus Education Program

Introduction

- Realizing CUK's education goals of 'Truth,' 'Love,' 'Service,' and 'Spirituality.'
- Training individuals who walk the path of true humanity.
- Cultivating various humanities-based knowledge before studying medicine.
- Comprising four years and 13 unit courses (approximately 300 hours).

Composition

Years 3-4 Medical Professionalism as the path pursued by Catholic healthcare professionals

Years 1-2 Comprehensive understanding of holistic medicine based on Catholic spirituality and social medicine.

In a society where mutual consideration is as important as expertise, we need to grow together.

CUK has created a unique education program that combines character education with expertise to cultivate talents with truth, love, and a spirit of service, in line with CUK's education objectives.

EDUCATION

A University Preparing for a Future that Leads Global Societal Development

Catholic University of Korea is actively participating in carbon neutrality, in line with its commitment to coexist with future generations

Recognized as the first university to receive an award from the Minister of Environment for its carbon-neutral efforts

From 2017, the CUK launched initiatives such as solar power installation, LED smart lighting replacement, high-efficiency heating and cooling systems, and a comprehensive energy management system.
In particular, the university's afforestation project, which has been ongoing since 2005 and involves planting over 14,000 saplings, has been highly commended for reducing greenhouse gases on campus. The CUK has been honored as the first university in Korea to receive an award from the Minister of Environment in recognition of its achievements and contributions to these initiatives.

Status of Carbon Neutrality

Door Hinge Replacement Project
Replacing traditional hinges with automatic-closing hinges at 180 locations
= **Increased building energy efficiency**

Smart LED Light Fixture Replacement Project
Changing 5,933 fixtures (25% of total)
= **Reduced electricity usage**

Project to establish solar photovoltaic power generation facilities
Establishing a 138kW solar power facility on the library rooftop
= **Replaced internal electricity consumption**

High-Efficiency Heating and Cooling Systems Project
Replacing 135 outdated heating and cooling systems
= **Reduced electricity and fuel consumption**

Carbon Neutrality Initiative

Installation of Solar Facilities on Campus
Planning to install solar power facilities on the rooftop of the Student Future Talent Building and the outdoor parking lot of the Songsim Building
» **To replace internal electricity usage**

Smart LED Light Fixture Replacement Project
Replacing 83% of all light fixtures with smart LED units by 2026
» **To decrease electricity consumption**

Outdated Heating and Cooling Systems Replacement Project
Reducing direct carbon emissions and enhancing energy efficiency by replacing old equipment with high-efficiency models
» **Individual Power Meter Installation Project**

Installing power meters in each building
Accurate electricity consumption measurement and data collection for basic research
» **Enhancing energy efficiency**

Environmentally Friendly Campus Initiatives

- Establishing a zero-waste campus
- Encouraging the conservation, reuse, and recycling of resources
- Utilizing energy-saving and renewable energy technologies

» **Energy Self-Sufficient University**

The fastest way to encounter
the future where I thrive is the
Catholic University of Korea.
